

THE OPPORTUNITY:

AlarmShield Incorporated is expanding and we are in need of Level 1 Voice and Data Technicians / Structured Cabling Installers for the structured-wiring infrastructure for communications networks in residential and commercial buildings. Structured wiring includes the following components:

- home entertainment system
- whole house (multi-room) audio
- multiple internet access points
- media centers and digital audio and video storage systems
- security systems
- access control (intercom)

These applications require high-capacity, high-speed wiring that can handle their electronic output, and inadequate wiring presents obstacles to the use of this digital paraphernalia. Becoming the structured wiring installer, this career path combines traditional tradesman skills with knowledge of computer networking and home entertainment systems.

RESPONSIBILITIES:

- Prewire low voltage wiring in structures during construction phase to N.E.C. standards with minimal supervision
- Install structured wiring for:
 - Surround sound, single and multi-zone speaker distribution systems, audio and video equipment
 - Alarm systems, video surveillance, entry access control, intercom, and automation systems
 - Lighting, shade and HVAC control
 - Central vacuum systems
- Terminating CAT3, CAT5e, CAT6, RG-6.
- Maintain and report accurate records of hours and materials used
- Report and monitor service order changes
- Use wire troubleshooting tools such as tracers
- Properly mount (secure, level, centered) various equipment including plasma TV's, projectors, volume controls, in-wall speakers, touch screens and etc.
- Ability to lift ~60 lbs.

REQUIREMENTS:

- Demonstrated commitment to safety
- Team player that is flexible and highly organized
- Must be a self-starter and willing to work with minimum supervision
- Must maintain a clean driving record and maintain a valid Ontario motor vehicle operator's license
- Must have a vehicle to travel to job site
- Have knowledge of pulling and dressing, labeling and terminating cable
- Level I Structured Cabling Installers will have experience working on 6 and 8 foot ladders with scissor lift experience a plus
- Energetic, enthusiastic and articulate
- Some post-secondary education preferred

COMPENSATION:

Part time: Pay will be based upon experience.

Our investment in you is to provide the guidance and structured learning environment. We are a focused group of individuals committed to creating a great workplace. Our work environment will challenge you to grow professionally and personally while having a lot of fun with great people. If you thrive in small, focused teams and high-energy

environments, are passionate about what you do, and are interested in having real impact in a growing, innovative industry, we want the chance to work with you.

TO APPLY:

Please state position applied for as "Level 1 Technician" and send resume by Email or Fax to ALARMSHIELD Inc.:

Email: HR@alarmshield.ca

Toll Free: 888-725-2760

Toronto: 647-797-4260

Kitchener/Waterloo: 226-808-2331

Fax: 1-888-725-2760

We appreciate all expressions of interest, however, as a practical matter, only select candidates whose backgrounds best match requirements will be contacted.

All candidates will be required to complete security clearance and background checks.

All resumes are retained and treated confidentially for consideration against future opportunities.
